

Murickens group is an ISO 9001:2015 certified company. In 1990 MG introduced two registered brand names i.e MG and Flyline to satisfy customer needs like low maintenance, competitive price, and the aim of power-saving. In a short period, Murickens Group introduced electronic products, refrigeration products, solar products as well as voltage control products to the market.

The Murickens Group launched a body storage unit in 2015 called the MG dead body fixed chamber, which is ideal for storing one or more dead bodies for long periods. The MG Deadbody Fixed Chamber is a unique unit that meets the needs of the market. It is not only a compact system but also a unit that works with very low power. It is an exclusive product of the Murickens Group. We are happy to be the first manufacturer and supplier of dead body mobile mortuary in this field, with more than 30-years of experience with thousands of satisfied customers in India and different parts of the world. Our valued and reputed clients list includes The CISF 7th Battalion Military Camp Chennai, Command hospital Chandimandir, St.Ursula hospital Pune, Shanti memorial hospital Cuttack, Dept. Of Space, Sriharikota, Birla research institute, Malayalee association Bhopal (Outside Kerala). Govt. Hospitals - Aluva, Kottayam, Varkala, Mulanthuruthy, etc. Co-operate Banks - Marayoor service co-operative bank Idukki, Karukutti service co-operative bank (Kerala) Al-Amin medical service Bangladesh, Saudi (exporting).

Murickens Group's Dead Body Fixed Mortuary Chamber is a new product made using the latest technology in the field of refrigeration. There are more features than any other mortuary available in the market today. The MG mortuary box is a lightweight, compact design and has low power consumption. Commonly available mortuaries on the market operate either with a compressor or a standby unit. Therefore, in case of any complaint, there is an immediate need for a technician to repair. Similarly, even if you have to keep one or two dead bodies, the whole unit has to work. This leads to a high power loss. Similarly, when working with a single compressor, the temperature is the same inside each unit. If a body needs a slight increase in temperature, it does not have a mechanism to set it up. But the new model MG dead body fixed Chamber unit is built as a solution to all the above issues. Each unit has a separate compressor so that each unit can be turned

on and off and the temperature set. Similarly, in the case of any repair to a cabin, we can move the body inside it to another cabin and solve the issue. We have single and multi-body fixed chambers for hospitals and nursing homes. Each chamber has a light and temperature meter, a voltmeter to know the line voltage and an alarm when the specified temperature goes down. Steel and copper were used to make this unit for long life.

Our greatest feature is the on-site warranty and after-sales service support.

MG DEAD BODY COMMERCIAL MORTUARY CABINET	
Model No. MG-MC	SINGLE CABINET MORTUARY
Dimension	Legth x Height x Width
Single Cabinet	91.5 " x 25 " x 28 " (232 cm x 63.5 cm x 71.05 cm)
Model No. MG-MC1	TWO CABINET MORTUARY
Dimension	91.5 " x 53 " x 28 " (232 cm x 134.62 cm x 71.05 cm)
Model No . MG-MC2	FOUR CABINET MORTUARY
Dimension	91.5 " x 53 " x 59 " (232 cm x 134.62 cm x 149.86 cm)
Input volt	220-230V
Separate - Control	Compressor /Power on –off / temperature control
Front Opening Door	Steel
Weight of mortuary	125 kg per unit
Compressor Nos.	1 Nos per unit .
Compressor - watts	Below 300 W special
Temperature	Digital display, adjustable temperature - separate all cabinet
Structure of the Body	Steel and copper Outer Steel 202,Gauge 22 Inner Steel 304 Gauge 26 Structure 202 Gauge 26
Applicable generator	8000 VA to 8500 VA
Above dimensions will change , according to the model	

MG CABINET MORTUARY FEATURES: -

▶ Power saver model. ▶ Independent one to four body chamber. ▶ On-off and control the unit separately. ▶ US Technology with low maintenance. ▶ Dead body can be preserved for longer periods. ▶ Stainless Steel stretcher. ▶ Mortuary body made-up of full pure Stainless steel and copper which provide complaint free working and long life. ▶ Fully automatic ▶ Adjustable Digital display thermo meter. ▶ Full PUF system (New technology). ▶ Front door opening. ▶ Light weight and compact size. ▶ Noiseless functioning. ▶ Temperature from -20C to -20oC. ▶ Alaram for system failure. ▶ Inside light is Available
